

KHAAD BHARAT

Farmer Biochar Application Guide

What is Biochar?

Biochar

A special charcoal made from burning plant waste

- ✓ Improves soil health
- ✓ Holds water & nutrients
- ✓ Helps crops grow better
- ✓ Low cost solution

Why Use Biochar? See the Difference!

WITH BIOCHAR:

- 🌱 Better Water Retention
- 🌱 More Nutrients Available
- 🌱 Healthy Soil Biology
- 🌱 Increased Crop Yield
- 🌱 Lower Input Costs
- 🌱 Sustainable Farming

How to Apply Biochar - 5 Simple Steps

1. PREPARE

Collect and dry your biochar (2-3 weeks)

2. MEASURE

Use 2-5 tons per hectare

3. SPREAD

Spread evenly on your field

4. MIX WITH SOIL

Mix thoroughly

5. WATER AND WAIT

Results in 2-3 months

Results & Best Practices

Expected Results:

2-3 months: Better soil structure

6 months: Increased water retention

1 year: 15-25% higher yields

Best Practices:

- ✓ Use in monsoon/rainy season
- ✓ Mix well with compost
- ✓ Apply before planting
- ✓ Use consistently
