

KHAAD BHARAT: Premium Organic Biochar

Official Product Specifications & Corporate Brochure

1. Product Overview

KHAAD BHARAT is a high-grade organic biochar amendment manufactured under strict quality standards by JSL Enterprises. Made from controlled, clean agricultural waste, pine needles, and bio-waste biomass feedstocks, it undergoes high-temperature pyrolysis to create an exceptionally stable, porous carbon structure. This product is designed for fields, commercial greenhouses, organic vegetable farms, and nursery propagation.

2. Chemical & Physical Specifications

- * **Fixed Carbon Content:** Greater than 80% dry basis, locking carbon in soil for decades.
- * **Surface Area:** 400 - 450 m² per gram, providing high porosity for microbial colonization.
- * **pH Range:** 7.5 - 8.5 (Slightly alkaline, helping neutralize acidic soils).
- * **Moisture Retention:** Holds up to 3 to 4 times its dry weight in water.
- * **Bulk Density:** 0.25 - 0.35 g/cm³, improving soil aeration and reducing soil compaction.

3. Key Benefits for Indian Crops

- * **Nutrient Sponge:** Reduces fertilizer run-off and leaching, saving up to 25% on chemical fertilizer costs.
- * **Water Saver:** Increases soil water-holding capacity, preventing drought stress and saving irrigation costs.
- * **Soil Aeration:** Reduces soil compaction in heavy clay and holds nutrients in sandy soils.

4. Product Packaging & Safety

Available in 5 kg, 20 kg, and 50 kg moisture-proof bags. KHAAD BHARAT Biochar is safe to handle and nontoxic for earthworms, birds, and beneficial soil microbes. Store in dry conditions.
